## **Key Points of Financial Results**

#### $\langle \text{Order received} \rangle$

Orders received by Facilities Construction Business, such as HVAC and Plumbing for Buildings and Industrial HVAC segments, greatly increased because of orders received of large-scale redevelopment projects in the metropolitan areas and continued steady domestic investments by manufacturers. Orders received by Environmental Systems increased by having received orders of large-scale projects, while those received by Machinery Systems decreased compared with the same period of the previous year, in which a large-scale project order was received. As a result, orders received by Plant & Machinery Systems Business slightly increased. The overall orders received marked greatly higher than that period.

#### $\langle Net Sales, Profit \rangle$

Even though net sales changed relatively flat year-on-year basis, gross profit margin was improved due to improvement of work efficiency in addition to thorough cost management. Gross profit, operating income, ordinary income, and profit attributable to owners of parent were all greatly improved year-onyear basis.

# [ Overall Results ]

## The 1st Quarter FY 2016 Results(Consolidated)

• Orders received highly exceeded year-on-year basis, and net sales changed relatively flat.

 All profit categories, such as gross profit, operating income, ordinary income, and profit attributable to owners of parent were greatly improved year-on-year basis.

#### Long-Term Vision "Century 2025"

We will strive over the next 10 years to become the company of choice for customers by

- Phase 1 → We will enhance quality by refining our skills and wisdom and developing our human resources as a foundation for responding to change.
  - Phase 2 → Superior quality generates customer satisfaction, and customer satisfaction and confidence leads to reliability.
    - $\blacksquare$  Phase 3  $\rightarrow$  Increased reliability will encourage more customers to choose our company.

#### Medium-Term Management Plan "Century 2025" Phase1

#### Key Initiatives and Strategies

#### 1. Passing on Technical Skills

We will renovate the Sanki Yamato Building (Yamato City, Kanagawa Prefecture) and reopen it as the Sanki Techno Center (tentative name). This will be a comprehensive training facility that imparts and develops the technical skills at the backbone of the Sanki Engineering Group.

#### 2. Anticipating the Age of Maintaining Building Stock

We will give a boost to the LCE business, as described in our SANKI VITAL PLAN 90<sup>th</sup>. This will bolster our business foundation, allowing us to maintain sound corporate management, even if the construction market experiences a slowdown.

#### 3. Developing Next-Generation Technologies

We will establish a new R&D base inside the Sanki Techno Center. Here we will develop technologies for the next generation while keeping up with advances in new technologies such as robotics, IoT, and artificial intelligence.

#### Medium-Term Management Plan "Century 2025" Phase1

#### **ESG** Policy

**Organically Integrate Existing Activities and Seek Strategic Deployment**

|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Environment | <ul> <li>As evidenced by the Paris Agreement, which created an international framework against global warming, and the Act on Promotion of Global Warming Countermeasures as well as other legislation passed in Japan in response, protecting the global environmental is becoming even more important. Recognizing that the business of the Sanki Engineering Group could have a direct impact on protecting the global environment:</li> <li>1. In our core Facilities Construction Business, we will contribute to reducing greenhouse gas emissions in the industrial and operational sectors of society by developing and providing various facilities and systems for air conditioning, plumbing, electricity, and network systems, as well as related services;</li> <li>2. In our Plant and Facilities Division, we will develop equipment that offers greater energy savings; and</li> <li>3. We will be mindful of reducing the impact on the global environment in all aspects of our business operations and pursue activities based on ISO 14000.</li> </ul> |
| Social      | <ol> <li>We will continue our SANKI YOU Eco Contribution Point social contribution activity, in which we extend<br/>donations to environmental conservation organizations according to the level of reduction in greenhouse gas<br/>emissions.</li> <li>We intend to create work environments that are even more worker friendly by implementing measures against<br/>long working hours and expanding opportunities for women and the elderly.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Governance  | <ol> <li>In fiscal 2016, we will launch a full-scale initiative under the Sanki Engineering Corporate Governance<br/>Guidelines established in December 2015.</li> <li>Under the leadership of the Board of Directors, we will operate and improve our internal control system and<br/>risk management systems to emphasize effectiveness.</li> <li>We will abide by our rules of conduct, including the Sanki Engineering Group Compliance Declaration, Sanki<br/>Engineering Group Code of Conduct and Action Guidelines, and Sanki Engineering Group Behavioral<br/>Standards and Guidelines, and strive to maintain and develop our corporate culture of ethical conduct.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                   |

#### Thank you for your kind attention.

#### **Remarks on Business Forecast**

The descriptions contained in this material, except for those as to past or present facts, are based on anticipations, assumptions, evaluations and estimations in light of the information available as of May 13,2016.
