

Local Communities

Basic Philosophy

As stated in the Sanki Engineering Group Code of Conduct and Action Guidelines, “We seek to contribute to society in order to aid in the development of local communities as a good corporate citizen and member of society,” and our activities reflect this principle. We will maintain active communication and continue to help with the development of the local communities where we operate.

Initiatives for Co-Existing with Local Communities

● Agreement for the Provision of Facilities in Times of Disaster

Sanki Engineering has concluded an agreement with Yamato City in Kanagawa Prefecture to provide a temporary shelter for those unable to return home in the wake of a disaster. Under the agreement, Sanki Techno Center will, in the event of an earthquake or other calamity, serve as a base of operations for local disaster prevention and emergency firefighting teams, and the Company will work to restore facilities for water supply and sewage in Yamato City.

In fiscal 2022, we constructed a water well to ensure the supply of potable water for neighborhood residents in the event of a disaster until water supply and sewerage systems are restored. The well is registered as Yamato City’s disaster preparedness well.

● Cleanup and Environmental Beautification Activities

Each branch, branch office, and Group company participates in cleanup activities in areas around their offices or construction sites as well as environmental beautification activities organized by municipal governments. On a Group-wide basis, we carried out activities in 42 local communities in fiscal 2022. The Group’s presidents also actively participate in events and encourage greater turnouts for local cleanups.

● Welcoming Study Tours to the Safety Experience Area and Other Training Facilities

The Sanki Techno Center welcomes study tours from government agencies, schools, and businesses to its Safety Experience area and other training facilities at the Techno Plaza. The Safety Experience area, which opened in fiscal 2019, gives visitors a first-hand visual experience of hazardous construction works. In fiscal 2022, 652 people visited the facility for a cumulative total of 4,336.

Supporting the Development of the Next Generation

● Opening the Sanki Environmental Garden to the Local Public

The Sanki Environmental Garden, adjacent to the Sanki Techno Center, is open round the clock to members of the local community, providing a place to play for many children from neighboring daycare centers. In March 2023, the total number of visitors reached approximately 50,000. We expect that the Sanki Environmental Garden will continue to be used by the community as a place to relax, and to nurture the next generation over the long term.

● Sanki Kankyo Service Welcomes Social Studies Tours by Local Schools

Our Group company Sanki Kankyo Service actively invites elementary school children for field trips at its offices. In fiscal 2022, 70 children from four elementary

schools in Hokkaido visited the offices and learned about the role and workings of the sewerage system. The company also helped some junior-high schools provide work experience for students in their social studies class.

● **Sponsoring the Chikyu Kyoshitsu Environmental Education Project**

In 2022, we participated as a special sponsor in Chikyu Kyoshitsu, an environmental education project hosted by The Asahi Shimbun Company for elementary and junior-high school children. In addition to serving as a teacher in the One-Day School on the Environment for some 80 elementary school children and 200 online participants across Japan, we visited elementary schools in Okinawa and Kumamoto prefectures. Under the title “Thinking about Comfortable Living and Energy Efficiency,” the visiting lessons were provided for 109 students to raise awareness about global environmental conservation through examples of the everyday comforts associated with air, water, and electricity.

Chikyu Kyoshitsu

Other Services to Society

● **Support for Sports Promotion and Revitalization**

We are an official sponsor of Yamato Sylphid, a women’s soccer team in Yamato City. We also sponsor the non-profit organization Japan Deaf Rugby Football Union (Deaf Rugby), Japan Handball Association, and East Hokkaido Cranes, an ice hockey team in Kushiro City, Hokkaido Prefecture. By supporting these sports, we continue to contribute to the revitalization of local communities.

● **Donations and Contributions**

We extend donations to universities and research institutes and sponsor cultural activities, including those by the Japan Symphony Foundation and the Kokoro no Gekijo (theater of the heart) project by the Shiki Theater Company. In addition, we support nature conservation activities in developing countries in the Asia-Pacific and other regions, collect donations for training guide dogs, and encourage our employees to donate blood on an ongoing basis. We also help with Mitsui Group social contribution activities through our support for the Mitsui Volunteer Network, which promotes the voluntary efforts of former employees of Mitsui Group companies.

● **Earthquake Reconstruction Project**

We launched the Earthquake Reconstruction Project in May 2012, a year after the Great East Japan Earthquake, as a Company-wide action team for contributing to the early recovery of the affected areas. Since then, we have conducted various activities each year to support the reconstruction effort, prevent memories of the disaster from fading, dispel harmful rumors, and share information on disaster prevention and mitigation.

Visiting an earthquake-stricken area

Activities in Fiscal 2022

- Provided a lunch menu featuring ingredients sourced from the Tohoku region at the Sanki Techno Center cafeteria
- Purchased products from a gift catalog supporting the affected areas, in collaboration with the employees union
- Co-sponsored a Tsugaru Shamisen competition
- Paid our seventh visit to affected areas
- Launched a permanent exhibit on reconstruction following the earthquake
