Financial Summary (Consolidated)

Order intake environment remained favorable, supported by robust capital investment in the private sector. With steady project progress and improved profit margin,

^{*} Since FY1983 when the Company started disclosure of consolidated financial statements

Consolidated Results (P/L, Orders Received)

- Net sales increased due to steady progress in projects carried forward in Facilities Construction and Environmental Systems
- Profit increased substantially due to higher net sales, as well as improvement in profit margin reflecting favorable order intake environment notably for Facilities Construction and cost reduction efforts in construction works
- Orders received increased as a result of numerous orders received for large-scale projects in Facilities Construction

Facilities Construction Business

Plant & Machinery Systems Business Increased substantially due to large-scale contracts awarded during the first six months for such projects as urban redevelopment and EV battery plant

Decreased as a result of order intake activities that took into consideration the construction work structure to manage the many projects carried forward in light of multiple large-scale contracts awarded in the preceding year in Environmental Systems.

Phase 3 Final Year

Medium-Term Management Plan "Century 2025" Phase 3 (FY2022 – FY2024) Performance Targets and Status of Achievement

During the period of the plan, while risk factors such as supply chain disruption and rising prices existed, construction investment remained solid, supported by robust private sector appetite for capital investment. In addition to this favorable business environment, the initiatives implemented under the long-term vision "Century 2025" to strengthen construction work structure and improve profit margin led to FY2024 results that substantially exceeded the performance targets set out for the final year of Phase 3.

	Performance Targets	FY2022 actual	FY2023 actual	FY2024 actual

FY2025 Forecast (Consolidated)

Net sales / Profit

Orders received

In view of contracts to be carried forward and outlook of order intake in the next fiscal year, net sales are projected to be generally in line with the fiscal year under review.

Profit is projected to increase given profit forecast of construction contracts to be carried forward and considering the likelihood of continued improvement in profit margin of construction works.

In view of the construction work structure that will take into consideration the situation whereby, compared to the previous fiscal year, more contracts have been secured that will be carried forward, in addition to uncertainty over the economic situation, orders received are projected to decrease although favorable order intake environment will likely continue.
